

The Trees

The properties are located approximately one kilometer from one of the best beaches on the island – Choeng Mon Beach. The residences are a single storey, three-bedroom configuration, on large, private allotments including 2 car parks. Local places of interest include Big Buddha and the famous Fisherman's Village, the latter providing some of the finest restaurants and bars on the island. The airport, shops, bars, restaurants, beaches, golf courses and hospitals are all within a few kilometers of the project site and the area is considered to be one of the best on Koh Samui.

This style of residence is unique to the island. Each property stands within its own private tropical gardens. The plot size is approximately 400 square meters, giving substantial recreational space to relax, enjoy and indeed entertain in. Nine villas make up the development with their very own private swimming pools and "sala" area. The villas are approximately 160 square meters under roof and have two master bedrooms with beautifully designed indoor/outdoor "en suite" bathrooms. A third bedroom or alternatively a study/office is available. We recommend the third bedroom option. A third bathroom is centrally located for use as a powder room and communal bathroom to ensure privacy in the master bedrooms.

A modern European kitchen and breakfast bar is provided with an open plan dining and living area, opening to the outdoor area. The emphasis is to enable the residents to open the internal area to the pool, deck and tropical garden area for a unique living experience, creating a large space for relaxation or entertaining. Integral fans in the living area provide a cool breeze throughout. A large pool is included at 14 + meters, running right up to the doors of one master bedroom, allowing residents to step out of the bedroom and into the water.

The properties will incorporate maximum use of natural light, and include features and air conditioning systems that allow the homes to maintain a comfortable temperature within.

The design of this property ensures that a high level of privacy is maintained for each residence. This will be achieved by the maximum use of natural landscaping, using a plentiful and diverse array of natural greenery. The objective is to provide each owner with complete seclusion when the garden gate is closed.

After sun down, the properties will be enhanced by the use of subtle lighting. The native foliage, Thai art and water features will be lit, providing an elegant appearance to the grounds.

The emphasis is on providing a very high quality product, designed by world class Bangkok based, Australian Architects, Woods Bagot.

Throughout construction, the highest quality materials will be used with the emphasis on "green building practices". Our commitment to the environment provides a balance between nature and design.
